PROFESSIONAL SUMMARY

With 3 years of experience in Software Quality Assurance, I specialize in ensuring the reliability of web and mobile application ecosystems, UI/UX, and backend API integrations. My core skills include building functional test suites, advanced bug tracing, documenting QA results, and creating informative, easy-to-understand user manuals. Through a strong analytical approach and proactive team collaboration, I focus on detecting risks early while ensuring an optimal end-user experience.

TECHNICAL SKILLS

Frameworks: React Js, Flutter.

Databases: PostgreSQL, MySQL, SQL.

Cloud & Tools: Gitlab, Github, Postman.

Manual Testing: Web & Mobile Testing, Functional & Non-Functional Testing, Regression Testing, User Acceptance Testing (UAT), Exploratory Testing.

Automation Testing: Selenium, Katalon Studio, Appium Inspector.

API Testing: Postman, RESTful API Testing, JSON/XML Validation, HTTP Status Codes.

Test Case Development: Test Scenario Design, Functional Test Cases, UI/UX & Usability Testing, Test Data Preparation.

Documentation: User Manual Documentation.

Bug Tracking and Monitoring: Trello, Jira, Asana.

WORK EXPERIENCE

Software Quality Assurance

Bogor, Indonesia

PT AMA SALAM INDONESIA

September 2023 – Present

- Designed and executed test scenarios covering logic, business flows, system integration, and end-to-end testing.
- Performed manual testing on mobile and web applications using positive and negative test cases.
- Ensured the system runs smoothly without errors and that data matches the expected results.
- Identified and helped resolve system defects, and maintained system testing and performance testing.
- Documented comprehensive QA test results for the initial SIT and UAT phases to support user testing readiness before production.
- Created user manual documentation for web and mobile systems.
- Collaborated with the BA and Developer teams to resolve system defects and prevent recurrence, ensuring production readiness.

Mobile Developer & FrontEnd Developer

Jakarta, Indonesia

PT Techub by Binawan

January 2022 – September 2023

- Developed web and mobile applications for a job vacancy portal system, using React JS for web and Flutter for mobile.
- Developed a mobile employee attendance application for recording check-in and check-out times and submitting leave requests, using React Js.
- Developed a web application for MBKM (Merdeka Belajar Kampus Merdeka), a Ministry of Education policy program that enables students to learn outside their study program or campus, using React JS.

System Engineer

Jakarta, Indonesia

PT Asuransi Allianz Life Indonesia

July – September 2021

- Installed Office 365 on 300 devices.
- Ensured no crashes occurred after the Office 365 installation.
- Documented users and devices that had been upgraded to Office 365.

Mentor/Instructor

Infra Digital Foundation

Jakarta, Indonesia

February – April 2021

- Served as a mentor in cyber security training.
- Delivered material on Basic Concepts of Information Security, Network Security, Ethical Hacking, Application Security, and more.
- Evaluated training through pre-tests and post-tests to measure participants' understanding of the material from the beginning to the end of the class.

EDUCATION

Binaniaga University

2021 – 2025

Information Systems • GPA 3.74/4.00

- Focused on the integration of business processes and information technology solutions, with expertise in systems analysis & design, database management, software development, and organizational IT governance.

Wikrama Vocational High School

2018 – 2021

Software Engineering

- Focused on mastering fundamental software engineering concepts and skills, including programming logic, system requirements analysis, and application development methodologies as a foundation for a career in the information technology industry.
